

Physical Dimensions of Aging

SECOND EDITION

Waneen W. Spirduso, EdD
The University of Texas, Austin

Karen L. Francis, PhD
University of San Francisco

Priscilla G. MacRae, PhD
Pepperdine University

Part III Motor Coordination, Motor Control, and Skill

Chapter 6 Balance, Posture, and Locomotion	131
Defining the Multiple Dimensions of Balance	132
Theoretical Framework of Balance and Mobility	134
Intrinsic Systems Contributing to Balance and Mobility	135
Age-Associated Changes in the Systems Contributing to Balance and Mobility	137
Posture	140
Evaluating the Multiple Dimensions of Balance	140
Locomotion	146
Age-Associated Changes in Gait	149
Measuring Gait	150
Falling—When Balance Fails	150
Can Falling of the Elderly Be Prevented?	151
Chapter 7 Behavioral Speed	157
Response Speed	158
Age-Sensitive Factors That Affect Response Speed	162
Reaction Time and Variability	165
Other Factors Influencing Speed of Processing	167
Theories of Response Slowing	167
Neurobiological Explanations of Age-Related Slowing	171
Movement Time	173
Functional Significance of Behavioral Speed	174
Chapter 8 Motor Coordination and Control	177
Definitions of Coordination, Control, and Learning	178
Age-Related Sensorimotor Changes That Affect Coordination and Control	179
Theoretical Strategies to Explain Coordination, Control, and Learning	181
How Coordination and Control Are Accomplished	181
Upper Limb and Hand Control	184
Aging Effects on Two Important Functional Tasks: Driving and Handwriting	191
Learning Physical Skills	198
Mechanisms of Learning: Neural Plasticity	202
Compensatory Strategies for Losses of Coordination	203
Psychological and Emotional Factors That Influence Coordination and Learning	204

Part IV Physical–Psychosocial Relationships

Chapter 9 Health, Exercise, and Cognitive Function	211
Concepts of Physical Activity, Health and Fitness, and Cognitive Function	212
Effects of Health and Physical Activity on Cognitive Function	213
Mechanisms by Which Physical Activity May Benefit Cognition	222
Process by Which Fitness May Benefit Cognitive Function	229
Implications of a Physical Activity–Cognition Relationship for Older Adults	231

Chapter 10 Health-Related Quality of Life	233
Quality of Life	234
Well-Being	235
Physical Function, Physical Activity, Fitness, and Exercise	248
Influence of Exercise on Well-Being	250
Characteristics of Exercise Related to Well-Being	254

Part V Physical Performance and Achievement

Chapter 11 Physical Function of Older Adults	261
Definitions of Physical Function	262
Hierarchy of Physical Function in Older Adults	262
Determining Physical Function in the Elderly	275
Role of Physical Activity in Postponing Disability and Facilitating Independent Living	280
Exercise Interventions and Physical Function	282
Expectations for Physical Performance of the Old and Oldest-Old	284

Chapter 12 Physically Elite Older Adults	287
Who Are the “Physically Elite” Older Adults?	288
Masters Athletes	288
Studying the Elite Physical Performance of Masters Athletes	289
Masters Athletes’ Record Performances	291
Estimating Age-Related Changes in Physiological Functional Capacity	305
Nonphysiological Factors That Influence Maximum Sport Performance	309
Social Support Systems and the Positive Secular Trend	313
How Do They Do It?	315

Glossary	317
References	325
Index	367
About the Authors	373
