The Probabilistic Mind:
Prospects for Bayesian cognitive science

Edited by
Nick Chater
University College London
UK

and

Mike Oaksford
Birkbeck College London
UK
# Table of Contents

## Part 1 Foundations

1. The probabilistic mind: prospects for a Bayesian cognitive science  3  
   *Nick Chater & Mike Oaksford*

2. A primer on probabilistic inference  33  
   *Thomas L. Griffiths & Alan Yuille*

3. Rational analyses, instrumentalism, and implementations  59  
   *David Danks*

## Part 2 Inference and Argument

4. Framing effects and rationality  79  
   *Shlomi Sher & Craig R. M. McKenzie*

5. Probability logic and the *Modus Ponens*—*Modus Tollens* asymmetry in conditional inference  97  
   *Mike Oaksford & Nick Chater*

6. Inference from absence in language and thought  121  
   *Ulrike Hahn & Mike Oaksford*

7. Towards a rational theory of human information acquisition  143  
   *Jonathan D. Nelson*

8. Pseudocontingencies—A key paradigm for understanding adaptive cognition  165  
   *Klaus Fiedler*

## Part 3 Judgement and Decision-Making

9. Bayesian brains and cognitive mechanisms: harmony or dissonance?  189  
   *Henry Brighton & Gerd Gigerenzer*

10. The game of life: how small samples render choice simpler  209  
    *Ralph Hertwig & Timothy J. Pleskac*

11. The *naïve* intuitive statistician: organism—environment relations from yet another angle  237  
    *Patrik Hansson, Peter Juslin, & Anders Winman*

12. A decision-by-sampling account of decision under risk  261  
    *Neil Stewart & Keith Simpson*
