Contents

Insights into Brain Connectivity Using Quantitative MRI Measures of White Matter
Andrew L Alexander and Nancy J Lobaugh ............................................ 221

Part III Analysis and Measures of Brain Connectivity

Simulation Frameworks for Large-Scale Brain Systems
Barry Horwitz and Fatima T Husain ...................................................... 275

Models of Effective Connectivity in Neural Systems
Klaas Enno Stephan and Karl J Friston .................................................. 303

Multichannel Data Analysis in Biomedical Research
Maciej Kaminski .................................................................................. 327

Beamforming and Its Applications to Brain Connectivity
Armin Fuchs ......................................................................................... 357

Frequency-Dependent Functional Connectivity Analysis of fMRI Data in Fourier and Wavelet Domains
R Salvador, S Achard and ET Bullmore .................................................. 379

Part IV Behavioral, Developmental and Clinical Applications

The Role of Neural Context in Large-Scale Neurocognitive Network Operations
Steven L Bressler and Anthony R McIntosh ........................................... 403

Neural Coordination Dynamics of Human Sensorimotor Behavior: A Review
Kelly J Jantzen and JA Scott Kelso ....................................................... 421

Maturation of Structural and Functional Connectivity in the Human Brain
Tomáš Paus ......................................................................................... 463

Brain Connectivity and the Spread of Epileptic Seizures
John G Milton, Sozari A Chikhenkeli and Vernon L Towle ................. 477

Large Scale Brain Dynamics and Connectivity in the Minimally Conscious State
Nicholas D Schiff ............................................................................... 505

Index ............................................................................................... 521
