Neural Correlates of Processing Syntax in Music and Language - Influences of Development, Musical Training, and Language Impairment

Der Fakultät für Biowissenschaften, Pharmazie und Psychologie der Universität Leipzig eingereichte

D I S S E R T A T I O N

zur Erlangung des akademischen Grades
doctor rerum naturalium
(Dr. rer. nat.)

vorgelegt von
Diplom-Psychologe Sebastian Jentschke
geboren am 31.01.1974 in Sangerhausen

Leipzig, den 27.04.2007
## Table of contents

1 Introduction 1

2 Music Perception 3
   2.1 Development of music perception 4
   2.2 Processing musical syntax 10
      *Theoretical accounts* 10
      *Computational modelling* 12
      *Empirical evidence* 14
   2.3 Neural correlates of music perception 15
   2.4 Conclusion 22

3 Musical Training 23
   3.1 Plasticity 23
   3.2 Skill improvement due to musical training 24
      *Musical skills* 25
      *Motor skills* 26
   3.3 Brain-anatomical correlates of musical training 27
   3.4 Neuronal functional effects of musical training 28
      *Extraction of Stimulus features* 29
      *Gestalt formation and analysis of intervals* 30
      *Structure building* 31
   3.5 Transfer effects to other cognitive domains 32
      *Innate musical talent?* 32
      *Influences of musical training on general cognitive functions* 33
      *Influences of musical training on Visual and spatial abilities* 34
      *Influences of musical training on language processing* 35
   3.6 Conclusion 36

4 Music and Language 39
4.1 Evolutionary considerations

4.2 Similarities in music and language acquisition

4.3 Similarities in processing music and language

Language prosody and music

Brain mechanisms for processing linguistic and musical syntax

4.4 Conclusion

5 Language Perception

5.1 Language acquisition

Theoretical accounts on language acquisition

Neurophysiological correlates of language acquisition

Constraints and learning mechanisms in language acquisition

Semantics

Syntax

5.2 Language processing

Processing syntactic structures

Neurophysiological-functional correlates of language processing

Anatomical correlates of language processing

5.3 Conclusions

6 Specific Language Impairment

6.1 Definition

6.2 Delayed and impaired language development

6.3 Risk factors

General processing limitations

Specific deficiencies in auditory and language processing

Biological, genetic and psychosocial risk factors

6.4 Specific language impairment and music perception

6.5 Conclusion
TABLE OF CONTENTS

7  Electroencephalography and Event-Related Potentials 87
8  Experiments I - IV: Introduction 93
9  Experiment I: Neural correlates of processing musical syntax in 2V2-year old children 95
   9.1  Introduction and Hypotheses 95
   9.2  Methods 95
      Participants 95
      Stimuli and paradigm 96
      EEG recording and processing 98
      Statistical evaluation 99
   9.3  Results 99
   9.4  Discussion 102
   9.5  Conclusion 104
10  Experiment II: Neural correlates of processing musical syntax in 5-year old children with either Specific Language Impairment or typical language development 107
   10.1  Introduction and Hypotheses 107
   10.2  Method 108
      Participants 108
      Stimuli and paradigm 109
      EEG recording and processing 111
      Statistical evaluation 111
   10.3  Results 112
   10.4  Discussion 118
   10.5  Conclusion 122
11  Experiment III: Neural correlates of musical and linguistic syntax processing in 9-year old children with or without musical training
## TABLE OF CONTENTS

11.1 Introduction and Hypotheses 123

11.2 Methods 4

*Participants*

*Stimuli and paradigm*

*EEG recording and processing* 127

*Statistical evaluation*

11.3 Results

11.4 Discussion

11.5 Conclusion 137

12 Experiment IV: Neural correlates of processing syntax in music and language in 11-year old children with or without musical training 139

12.1 Introduction and Hypotheses 139

12.2 Methods 139

*Participants* 139

*Statistical evaluation* 140

12.3 Results 142

12.4 Discussion 150

12.5 Conclusion 153

13 Experiment I - IV: Development of the Neural Correlates of Music-Syntactic Processing 155

14 General Discussion 159

14.1 Summary: Results of Experiment I to IV 159

14.2 Influences of Musical Training, Language Impairment, and Development on Processing Musical and Linguistic Syntax 163

14.3 Commonalities between the neural correlates of processing musical and linguistic syntax 165

14.4 Future perspectives 166
