List of examples
Note on orthography
Note on music notations

1. Introduction
   1.1 A rāg performance
   1.2 Some prefatory remarks
   1.3 The aims and scope of the present study

2. Theoretical perspectives I: musical time in Indian cultural perspective
   2.1 Introduction
   2.2 Time measurement
   2.3 Musical performance as process
   2.4 Cyclicity in musical and cosmic time
      2.4.1 Time in Indian thought
      2.4.2 Images of cyclicity in music
      2.4.3 Linearity, narrativity, and cyclicity

3. Theoretical perspectives II: general theories of rhythm and metre
   3.1 Introduction
   3.2 Metre: an ethnomusicological perspective
      3.2.1 Problems of metre in ethnomusicology
      3.2.2 Three theories on metre
      3.2.3 The subjectivity of metre
   3.3 Metre vs. rhythm in Western and Indian music
   3.4 Metre, cognition, and the present
   3.5 Additive or complex metre
      3.5.1 From additive and divisive rhythm...
      3.5.2 ... to irregular or complex metre
   3.6 Summary: six statements on metre

4. Tāl theory as a model of rhythmic organization
   4.1 An outline of tāl theory
      4.1.1 Implications of tāl theory
      4.1.2 Limitations of tāl theory
4.2 

4.2.1 Syllabic style and a ‘syllabic’ model of rhythmic organization

4.2.2 Melismatic style and a ‘melismatic’ model of rhythmic organization

4.2.3 The tabla theka and a hybrid model of rhythmic organization

4.2.4 Summary: a unified model of rhythmic organization in North Indian music

5. 

5.1 

5.1.1 Common tals of North Indian music

5.1.2 Functions of tal

5.2 Quantitative functions: time measurement and division

5.2.1 Clap patterns (cheironomy)

5.2.2 Theka and time measurement

5.2.3 The relationship between clap pattern and theka

5.3 Qualitative functions: rhythmic character and accentual patterns

5.3.1 Observations on the character of tals

7. Seven-matra tals

10. Ten-matra tals

12. Twelve-matra tals

5.3.2 Theka as accentual pattern

5.4 Cyclicity

5.4.1 Theka and cyclicity: the case of tīntāl

5.4.2 Cyclicity in practice

5.5 Summary: tal functions and the theoretical model of rhythmic organization

6. Lay: tempo and rhythmic density

6.1 The concept of lay in Hindustānī music

6.1.1 Definition and usage of the term

6.1.2 Tempo and metrical structure

6.1.3 Determining the effective pulse rate

6.2 The measurement of lay

6.2.1 Determining lay (tempo and rhythmic density)

6.2.2 Lay in performance

Tempo

Rhythmic density

Cycle length

6.2.3 Variation of tempo in performance

Contents

4.2 Tāl as metric structure

5. Tāl in practice: quantitative, qualitative, and cyclic functions

6. Lay: tempo and rhythmic density
Contents

6.3 Summary 91

7. Performance practice and rhythm in Hindustānī music 93
  7.1 Introduction 93
    7.1.1 Elements of performance and their organization 94
  7.2 Ālāp: unmetred (anibaddh) forms 95
    7.2.1 Ālāp: pulsed or unpulsed? 97
    Theoretical perspectives 97
    An example of instrumental ālāp 100
    7.2.2 Jor: metred or unmetred? 103
  7.3 Bandīs and development: metred (nibaddh) forms 106
    7.3.1 Development techniques and their resolution into rhythmic parameters 106
    7.3.2 Performance processes 108
    Episodic organization of development 108
    Acceleration 108
    7.3.3 The percussion accompaniment 111

8. The bandīs 113
  8.1 The place and importance of the bandīs 113
    8.1.1 The length of the bandīs 114
  8.2 Rhythmic structure of vocal bandīses 116
    8.2.1 Verse metre and text distribution 119
  8.3 Rhythmic structure in instrumental gats 124
    8.3.1 Vilambit gats 125
    8.3.2 Madhya lay gats 128
    8.3.3 Drut gats 129
  8.4 Further issues in bandīs structure 131
    8.4.1 Mukhrās in vocal and instrumental bandīses 131
    8.4.2 A note on the antarā and variation of structure between lines 132
    8.4.3 Variation of the bandīs structure 133
  8.5 Summary 136

9. Development techniques and processes 137
  9.1 Introduction 137
  9.2 Rāg-oriented development 138
    9.2.1 Vocal performance 138
    9.2.2 Instrumental performance 142
  9.3 Rhythm and/or text-oriented development 145
    9.3.1 Vocal performance 145
    9.3.2 Instrumental performance 150
  9.4 Summary 151
10. Laykārī: rhythmic variation

10.1 The concept of laykārī

10.2 Divisive laykārī: definition and variation of lay ratio

10.2.1 Terminology

10.2.2 Usage

10.2.3 Lay bānt

10.2.4 Rhythmic patterns and grouping structure

10.3 Generation and variation of rhythmic patterns

10.3.1 Variation and development

10.3.2 Yati

10.3.3 Cadential techniques

10.3.4 Tihāt

10.3.5 Cakkardār and nauhār tihāts

10.3.6 Sam and viṣam in laykārī

10.4 Usage of laykārī techniques

10.4.1 Laykārī in improvisation

10.4.2 Computation in laykārī

10.5 Summary

11. A case study in rhythmic analysis: instrumental vilambit and madhya lay gats in the repertoire of Deepak Choudhury (Maihar Gharānā)

11.1 Introduction

11.2 The case study

11.3 Results

11.3.1 Tal structure

11.3.2 Gat structure

11.3.3 Development procedures

11.3.4 Lay

11.3.5 Accompaniment style

11.3.6 Correlation of rhythmic parameters

11.4 Conclusions

12. North Indian rhythmic organization in cross-cultural perspective

12.1 Introduction

12.2 Metre and tāl

12.2.1 Six statements revisited

12.2.2 Tāl and the general study of metre

12.3 Free rhythm and music without tāl

12.3.1 Free rhythm and ālāp

12.3.2 Free rhythm and metre in music without tāl

12.4 Tāl, metre, and free rhythm—a summary
