Preface.................................................................................................................. V

Contents............................................................................................................... ix

Contributors....................................................................................................... xi

Theoretical Perspectives and Developmental Models

1  The Concept of Competence in Educational Contexts
   Eckhard Klieme, Johannes Hartig, and Dominique Rauch ........................................ 3

2  Competencies for Successful Learning:
   Developmental Changes and Constraints
   Marcus Hasselhorn.................................................................................................. 23

3  A Model-Based Test of Competence Profile and
   Competence Level in Deductive Reasoning
   Christiane Spiel and Judith Glück......................................................................... 45

Psychometric Modeling

4  Psychometric Models for the Assessment of Competencies
   Johannes Hartig................................................................................................... 69

5  Explanatory Item Response Models: A Brief Introduction
   Mark Wilson, Paul De Boeck, and Claus H. Carstensen........................................ 91

6  Linking Competencies in Horizontal, Vertical, and
   Longitudinal Settings and Measuring Growth
   Alina A. von Davier, Claus H. Carstensen, and Matthias von Davier ..................... 121

7  Reporting Test Outcomes Using Models for Cognitive Diagnosis
   Matthias von Davier, Lou DiBello, and Kentaro Yamamoto .................................. 151
## Assessment Methods and Technology
