Behavioral and electrophysiological indices of processing aesthetics of graphic patterns and human faces
## Contents

1  **General Introduction**  
1.1 Historical and terminological introduction of aesthetics  
1.1.1 Aesthetics  
1.1.2 Experimental aesthetics  
1.2 Aesthetic appreciation of beauty in the context of this thesis  
1.3 Methodological introduction  
1.3.1 Behavioral performance  
1.3.2 Electrophysiological data  
1.3.3 Preliminary considerations  
1.4 Previous study  

2  **Electrophysiological indices of processing symmetry and aesthetics:**  
   A result of judgment categorization or judgment report?  
2.1 Introduction  
2.1.1 Categorization versus report components  
2.1.2 Present study  
2.2 Method  
2.2.1 Participants  
2.2.2 Stimulus material  
2.2.3 Apparatus  
2.2.4 Procedure  
2.2.5 Data acquisition  
2.2.6 Data analysis  
2.3 Results  
2.3.1 Behavioral performance  
2.3.2 Electrophysiological data  
2.4 Discussion  
2.4.1 Behavioral performance  
2.4.2 Electrophysiological data  
2.5 Conclusion  

3  **Electrophysiological indices of processing aesthetics:** Spontaneous or intentional processes?  
3.1 Introduction  
3.1.1 Present study  
3.1.2 Hypotheses  
3.2 Method  
3.2.1 Participants  
3.2.2 Stimulus material  
3.2.3 Apparatus  
3.2.4 Procedure  
3.2.5 Data acquisition
4 The concept of aesthetics of faces and its relevance for current theories of sexual selection

5 Aesthetics of faces: Behavioral and electrophysiological indices of evaluative and descriptive judgment processes
6 GENERAL DISCUSSION

6.1 Aesthetic appreciation of beauty
6.2 Studies using graphic patterns as stimulus material
6.3 Studies using faces as stimulus material

7 CONCLUSION AND PROSPECT
