CONTENTS

Contributors ix

1. Adaptive Memory: Evolutionary Constraints on Remembering 1
   James S. Nairne
   1. Introduction: Nature's Criterion 2
   2. The Mnemonic Value of Fitness-Relevant Processing 3
   3. Memory Theory and Nature's Criterion 12
   4. Remembering with a Stone-Age Brain 20
   5. Conclusions 27
   Acknowledgments 28
   References 28

2. Digging into Déjà Vu: Recent Research on Possible Mechanisms 33
   Alan S. Brown and Elizabeth J. Marsh
   1. Introduction 34
   2. Perceptual Explanation 36
   3. Implicit Memory Explanation 43
   4. Physiological Explanation 52
   5. Reports in Anomalous Individuals 54
   6. Continuing Issues 56
   7. Concluding Remarks 59
   References 60

   Peter F. Delaney, Peter P. J. L. Verkoeijen, and Arie Spirgel
   1. Introduction 64
   2. A Field Guide to the Spacing Literature: Spotting Impostors 66
   3. The Failure of Existing Spacing Theories 80
   4. Extending a Context Plus Study-Phase Retrieval Account of Spacing Effects 104
   5. The Testing Effect 112
6. Spacing and Testing in Educational Contexts 126
7. Conclusions 135
References 137

4. How One's Hook Is Baited Matters for Catching an Analogy 149
   Jeffrey Loewenstein
   1. Introduction 150
   2. Key Roles for Retrieving Analogies 151
   3. Underlying Structure and Retrieving Analogies 160
   4. Facilitating the Retrieval of Analogies at Retrieval Time 167
   5. Implications 173
   6. Conclusion 176
   References 177

5. Generating Inductive Inferences: Premise Relations and Property Effects 183
   John D. Coley and Nadya Y. Vasilyeva
   1. Introduction 184
   2. Effects of Premise Relations on Inference Generation 191
   3. Effects of Property on Inference Generation 203
   4. Inference Generation: Conclusions and Implications 217
   Acknowledgments 224
   References 224

6. From Uncertainly Exact to Certainly Vague: Epistemic Uncertainty and Approximation in Science and Engineering Problem Solving 227
   Christian D. Schunn
   1. Introduction 228
   2. Linguistic Pragmatics of Uncertainty and Approximation 229
   3. Coding Approximation and Uncertainty from Speech 231
   4. Coding Uncertainty from Gestures 234
   5. Uncertainty, Approximation, and Expertise 237
   6. From Uncertainty to Approximation via Spatial Reasoning 241
   7. Summary and Discussion 246
   8. Future Directions 248
   Acknowledgments 249
   References 250
Jeffrey M. Zacks and Jesse Q. Sargent
1. Introduction 254
2. Event Segmentation Theory 255
3. Schizophrenia 262
4. Obsessive-Compulsive Disorder 264
5. Parkinson's Disease 269
6. Lesions of the Prefrontal Cortex 272
7. Aging 275
8. Alzheimer's Disease 282
9. Conclusions 287
Acknowledgments 290
References 290

8. Two Minds, One Dialog: Coordinating Speaking and Understanding
Susan E. Brennan, Alexia Galati, and Anna K. Kuhlen
1. Introduction: The Joint Nature of Language Processing 302
2. Dialog: Beyond Transcripts 304
3. Process Models of Dialog 307
4. The Role of Cues in Grounding 313
5. Partner-Specific Processing 315
6. Neural Bases of Partner-Adapted Processing 324
7. Conclusions 335
Acknowledgments 337
References 338

9. Retrieving Personal Names, Referring Expressions, and Terms of Address
Zenzi M. Griffin
1. Introduction 345
2. Psychological Research on Personal Name Production 346
3. Personal Names and Reference Across Cultures 364
4. Direct Address in Spoken Language 371
5. Conclusion 379
Acknowledgments 379
References 380
