## Contents

**Contributors** ....................................................... xi
**Preface** .................................................................. xxi

### I. Introduction

1. Historical Development of Animal Models of Aging .................. 1
   *Richard L. Sprott and Steven N. Austad*
2. Species Selection in Comparative Studies of Aging and Antiaging Research .......................... 9
   *João Pedro de Magalhães*
3. Principles of Animal Use for Gerontological Research ............. 21
   *Richard A. Miller*
4. From Primary Cultures to the Aging Organism: Lessons from Human T Lymphocytes ......................... 33
   *Rita B. Effros*
5. Models of Systems Failure in Aging ................................... 45
   *Leonid A. Gavrilov and Natalia S. Gavrilova*
6. Major Issues in Ethics of Aging Research ............................... 69
   *Michael D. Smith*
7. Ethical Aspects of Research Involving Elderly Persons ............. 79
   *Paul S. Mueller and C. Christopher Hook*

### II. General Methods

8. SAGE KE and Other Online Sources Related to Aging ................. 93
   *Evelyn Strauss and R. John Davenport*
   *Christian Schöneich*
10. Application of High-Throughput Technologies to Aging-Related Research ............................................. 109
    *Matt Kaeberlein*
11. Models of Alzheimer’s Disease ......................................... 121
    *Harry LeVine III and Lary C. Walker*
12. Age-Related Hippocampal Dysfunction: Early Alzheimer’s Disease vs. Normal Aging ....................... 135
    *Scott A. Small*
13. Epidemiology in Aging Research ........................................ 143
    *Hermann Brenner and Volker Arndt*
    *Chenxi Wang, Scott W. Keith, Kevin R. Fontaine, and David B. Allison*
15. Models for the Study of Infection in Populations .................... 165
    *John R. Williams*
### III. Animal Models

#### A. Non-mammalian Systems

17. Telomeres and Aging in the Yeast Model System ................................. 191  
   *Kurt W. Range*

18. Longevity and Aging in Budding Yeast ................................................. 207  
   *Matt Kaeberlein*

19. From Yeast Methuselah Genes to Evolutionary Medicine ........................... 219  
   *Paola Fabrizio and Valter D. Longo*

20. *Strongyloides ratti*: A Nematode with Extraordinary Plasticity in Aging ...... 229  
   *Michael P. Gardner, David Gems, and Mark E. Viney*

21. Insect Models for the Study of Aging .................................................. 241  
   *Klaus-Günter Collatz*

22. *Drosophila* Models of Aging ............................................................... 253  
   *Satomi Miwa and Alan Cohen*

23. Models of Aging in Honeybee Workers ................................................. 267  
   *Gro V. Amdam and Olav Rueppell*

24. Ants as Naturally Long-lived Insect Models for Aging ............................. 277  
   *Joel D. Parker and Karen M. Parker*

25. Gene Expression and the Extended Longevity Phenotypes of *Drosophila melanogaster* ................................................................. 283  
   *Robert Arking*

26. Annual Fish as a Genetic Model for Aging ........................................... 301  
   *Pudur Jagadeeswaran*

27. The Use of Mature Zebrafish (*Danio rerio*) as a Model for Human Aging and Disease ......................................................... 309  
   *Evan T. Keller, Jill M. Keller, and Gavin Gillespie*

28. Zebrafish as Aging Models ................................................................. 317  
   *Shuji Kishi*

29. Telomeres in Aging: Birds ................................................................. 339  
   *Susan E. Swanberg and Mary E. Delany*

30. Domestic and Wild Bird Models for the Study of Aging .......................... 351  
   *Donna J. Holmes and Mary Ann Ottinger*

#### B. Mammalian Systems

31. A Transgenic Mini Rat Strain as a Tool for Studying Aging and Calorie Restriction ............................................................... 367  
   *Isao Shimokawa*

32. Rat Models of Age-Related Cognitive Decline ........................................ 379  
   *Jennifer L. Bizon and Michelle M. Nicolle*

33. Aged Rodents for Biogerontology Research .......................................... 393  
   *Nancy L. Nadon*

34. Life Extension in the Dwarf Mouse ...................................................... 403  
   *Andrzej Bartke*

35. The Canine Model of Human Brain Aging: Cognition, Behavior, and Neuropathology ............................................................... 415  
   *P. Dwight Tapp and Christina T. Siwak*

36. Bats as a Novel Model for Aging Research .......................................... 435  
   *Anja K. Brunet-Rossinni and Rocco E. Rossinni*

   *Iain A. Wilson*

38. The Rhesus Macaque as a Model of Human Aging and Age-Related Disease ............................................................... 457  
   *Mary Ann Ottinger, Julie A. Mattison, Mary B. Zelinski, Julie M. Wu, Steven G. Kohama, George S. Roth, Mark A. Lane, and Donald K. Ingram*

39. Nonhuman Primates as a Models for Reproductive Aging and Human Infertility ............................................................... 469  
   *Barry D. Bavister and Carol A. Brenner*
IV. Comparative Models

40. Neurobiology of the Aging Brain .............................................485
   Carlo Bertoni-Freddari, Patrizia Fattoretti, Tiziana Casoli, and Giuseppina Di Stefano
41. Mitochondrial DNA and Aging ..........................507
   Mikhail Alexeyev, Susan P. LeDoux, and Glenn L. Wilson
42. Models for Apoptosis: From Newborn to Adult ..........521
   Christiane Charriaut-Marlangue and Sylvain Renolleau
43. Age-related Changes in Hormones and Their Receptors in Animal Models of Female Reproductive Senescence ...........................................533
   Jacqueline A. Maffucci and Andrea C. Gore
44. Models of Chaperones in Aging ..................553
   Jens Kroll and J. O. Nehlin
45. Therapeutic Potential of Stem Cells in Aging-Related Diseases ..................563
   Shannon Whirledge, Kirk C. Lo, and Dolores J. Lamb
46. Nuclear Transfer and Cloning: Preservation or Expansion of Proliferative Lifespan? .........575
   Keith E. Latham
47. Human Models of Longevity ..........................585
   Thomas Perls
48. Computational Models of Mitochondrial DNA in Aging ..................591
   David C. Samuels
49. Mouse Models of Accelerated Aging .....................................601
   Jan Vijg and Paul Hasty

50. Fertility and Aging Men: An Introduction to the Male Biological Clock ..........631
   Peter N. Schlegel, Puneet Masson, Sarah M. Lambert, and Harry Fisch
52. Benign Prostatic Hyperplasia ..................641
   Peter Celen
53. Murine Models of Infectious Diseases in the Aged ...............651
   Kevin P. High
54. Studying Infection in the Elderly: Physiopathology, Clinical Symptoms and Causative Agents of Pneumonia ..........661
   Jean-Paul Janssens
55. Diabetes and Aging ..................................671
   Tamas Fulop, Anis Larbi, Daniel Tessier, and Andre Carpentier
56. Diabetes as a Model of Premature Aging ..........................687
   Arshag D. Mooradian
57. Frailty as a Model of Aging ..................697
   Jeremy D. Walston
58. Osteoporosis and Cardiovascular Disease in the Elderly ..................703
   Samy I. McFarlane, John Nicasio, and Ranganath Muniyappa
59. Depression in Older Patients ..........................713
   Kiran Rabheru
60. The Aging Human Lung: Age-Associated Changes in Structure and Function ....727
   Keith C. Meyer
61. Iceland as a Model for Human Aging ..........................735
   Adalsteinn Gudmundsson and Pálmi V. Jónsson
62. Behavior and Personality in the Study of Successful Aging ..................741
   Judith Corr and Loraine Tarou

V. Disease-States and Normal Aging

A. Disease States
50. Models, Definitions, and Criteria of Frailty ..........................619
   David B. Hogan
63. Andropause ..................................749
   Rabih Hijazi and Glenn R. Cunningham
64. Aging and the Perceptual Organization of Sounds: A Change of Scene? ..........759
   Claude Alain, Benjamin J. Dyson, and Joel S. Snyder
