WHITE MATTER IN COGNITIVE NEUROSCIENCE
ADVANCES IN DIFFUSION TENSOR IMAGING AND ITS APPLICATIONS

Editors
JOHN L. ULMER, LAWRENCE PARSONS, MICHAEL MOSELEY, AND JOHN GABRIELI

This volume is the result of a workshop entitled White Matter in the Cognitive Neurosciences: Advances in Diffusion Tensor Imaging and Its Applications, held on August 19–20, 2004, at the New York Academy of Sciences in New York City.

CONTENTS

Preface. By LEIGHTON P. MARK AND JOHN L. ULMER ........................................ vii
Combining Functional and Diffusion Tensor MRI. By DAE-SHIK KIM
AND MINA KIM ........................................................................................................... 1
Investigating the Functional Role of Callosal Connections with Dynamic
Causal Models. By KLAAS E. STEPHAN, WILL D. PENNY,
JOHN C. MARSHALL, GEREON R. FINK, AND KARL J. FRISTON ............... 16
Age-Related Changes in Prefrontal White Matter Measured by Diffusion
Tensor Imaging. By D. H. SALAT, D. S. TUCH, N. D. HEVELONE,
B. FISCHL, S. CORKIN, H. D. ROSAS, AND A. M. DALE ......................... 37
Diffusion Tensor Imaging of the Spinal Cord. By STEPHAN E. MAIER
AND HATSUHO MAMATA ................................................................................... 50
Amyotrophic Lateral Sclerosis and Primary Lateral Sclerosis: The Role of
Diffusion Tensor Imaging and Other Advanced MR-Based Techniques
as Objective Upper Motor Neuron Markers. By SUMEI WANG AND
ELIAS R. MELHEM ........................................................................................... 61
White Matter Tractography by Means of Turboprop Diffusion Tensor Imaging. By Konstantinos Arfanakis, Minzhi Gui, and Mariana Lazar .................................................. 78

Multiple-Fiber Reconstruction Algorithms for Diffusion MRI. By Daniel C. Alexander .................................................. 113

Brain/Language Relationships Identified with Diffusion and Perfusion MRI: Clinical Applications in Neurology and Neurosurgery. By Argye E. Hillis .................................................. 149

White Matter and Behavioral Neurology. By Christopher M. Filley .................... 162

Principal Diffusion Direction in Peritumoral Fiber Tracts: Color Map Patterns and Directional Statistics. By Aaron S. Field, Yu-Chien Wu, and Andrew L. Alexander .................. 193

Applications of Diffusion Tensor MR Imaging in Multiple Sclerosis. By Yulin Ge, Meng Law, and Robert I. Grossman ........ 202

Quantitative Analysis of Diffusion Tensor Imaging Data in Serial Assessment of Krabbe Disease. By James M. Provenzale, Maria Escolar, and Joanne Kurtzberg .... 220

Index of Contributors .................................................................. 231

Financial assistance was received from:

• GENERAL ELECTRIC HEALTH CARE SYSTEMS
• MUSHETT FAMILY FOUNDATION
• NATIONAL INSTITUTES OF HEALTH
• NATIONAL SCIENCE FOUNDATION
• NEW YORK ACADEMY OF SCIENCES
• SIEMENS MEDICAL

The New York Academy of Sciences believes it has a responsibility to provide an open forum for discussion of scientific questions. The positions taken by the participants in the reported conferences are their own and not necessarily those of the Academy. The Academy has no intent to influence legislation by providing such forums.
